**Announcement/ Public Notice**

**Subject: Campaign Initiated to Promote Proper Implementation of Environment Education in University of Delhi (DU)**

Delhi Greens is running a campaign to promote proper implementation of Environmental Education in different colleges of the University of Delhi (DU). The Campaign has been initiated after learning disturbing news from the media that teachers who have not studied Environment themselves are being made to teach the subject in DU ([Click here](#) to read one of many such news items on the Indian Express website).

In the first phase of this campaign, Delhi Greens is sending request letters to all defaulting colleges of the University of Delhi to ensure that only the eligible candidate are selected to teach Environmental Studies/ Science to the students henceforth. The state of Environment today is getting more and more concerning and it is important that the students are given the right environment education from eligible teachers. We hope all colleges of the University of Delhi will respect the decision of the Hon'ble Supreme Court in letter and spirit from the 2019-20 academic year onward.
